

LOOK YOUR BEST AT ANY AGE **AS SEEN IN MIMI VANDERHAVEN**

Titan tightens sagging skin

by **MimiVanderhaven**

Mimi: Mimi's cousin, Mona, has lost a considerable amount of weight, but it's left her skin looking a bit looser than she'd like. Can you help?

Dr. Stefanie: I like to use Cutera Titan on my patients, which gives them an all-natural option to enhance skin tone. Titan uses light energy to heat the dermis deep beneath the skin's surface. Without surgery, recovery time, or injections, Titan is an ideal solution to tighten the skin on the face, neck, abdomen, and arms.

Dr. Stefanie Christian

Mimi: How does it work?

Dr. Stefanie: Titan utilizes a safe, infrared light to heat the dermis well below the skin's surface. During the procedure, the skin's top surface (epidermis) is protected through continuous cooling with the Titan hand piece.

Mimi: What areas respond best to this procedure?

Dr. Stefanie: My patients have been successfully treated on many areas of the body. The most common areas treated,

however, are the cheeks, the jaw line, the neck, the backs of the arms, and the abdomen. Since the Titan procedure heats tissue under the skin's surface, patients of any skin type or age can be treated.

Mimi: Is it similar to liposuction?

Dr. Stefanie: No, not at all. Titan will not remove fat cells. Some patients think they need to tighten but cannot because the skin contains fat. I can determine if Titan is the right form of treatment, or not.

Mimi: (Thoughtfully running a finger over her jaw line.) How many treatments will Mona need?

Dr. Stefanie: (Smiling) Although a single treatment has produced very good results for many of my patients, it is quite common for them to get the best results after having two or three Titan treatments over a few months.

Mimi readers will receive \$100 off their first Titan treatment when they mention this story. This offer is valid until July 31, 2009.

Timeless Laser and Skin Care is located in Bay Village at the Ann Reichel Skincare Salon, 660 Dover Center Road, Suite 2A, 44140, and in North Olmsted at Advanced Dental Care & Aesthetics, 4780 Clague Road, 44070.
